

IIRIS SaltEq - a new and powerful halogenerator for horses!

Horses have benefited from salt therapy for a long time – it alleviates their breathing and increases their lung capacity and stamina. The performance of the sport horses rises.

Over the years, different halogenerator manufacturers have come up with salt therapy devices for horses or they have offered their existing human-use halogenerators for the equine use. This was not necessarily a bad idea. However, there are several things to consider when designing a halogenerator for horses...First of all, this cannot be a cheap device in a sense where you save on quality! Stable conditions are harsh and dry salt aerosol is sensitive to humidity.

IIRIS SaltEq meets the demand of the horse and stable owners and has eliminated the shortcomings of predecessors:

- ✓ SaltEq is a portable device. The stable owner can walk with it from box to box, take it to the exhibitions and remove it from the stable after use.
- ✓ SaltEq is a super powerful device creating a fine mist of dry salt aerosol which horses enjoy. There are 6 intensity levels.
- ✓ SaltEq is quiet – horses won't mind the quiet buzz.
- ✓ SaltEq is made of AISI316 grade stainless steel which makes it sturdy and protected from corrosion.
